For Immediate Release
April 2006

It's full speed ahead for Kraken Automation with R.A. Jones Launch of the NEW Affordable, All-Servo Legend® Series L200 Cartoners...with Cartoning Speeds of up to 200 Cartons Per Minute and with an 8 Week Delivery

Jones Legend® Series L200 Cartoner System

Rotary Vane Infeed & Transfer

BURLINGTON, On. (April 2006) Kraken Automation Inc., Jones' Agent for the New **Legend® Series L200** all Servo Cartoners in Canada, is very excited about selling the new market entry Cartoner from Jones. The NEW **Legend® Series L200** cartoner is a step down version of the Meridian but with tremendous performance making it a formidable, well positioned cartoner that addresses market and customer requirements not previously served by Jones.

The new **Legend® Series L200** now combines the technology capabilities of Jones and Kraken to offer a pre-engineered cartoner solution package with optional product handling and transfer systems allowing us to address, within its cartoner class a wide range of application requirements such as Bakery, Cereal, Snacks, Breakfast Meals, Frozen Foods, Pharmaceuticals, Household Goods and durable manufacturing.

The **Legend® Series L200** offers great flexibility with both right and left hand machine configurations and will run a wider variety of product at speeds of up to 200 cartons per minute. The overall base frame is 24'-5" in both 9" and 12" center configurations with minimal changeover. The frame system is a welded stainless steel tubular hygienic design with no holes and will allow debris to fall through to the floor.

The all-servo L200 cartoner with a smooth and efficient servo rotary carton feed, 4 ft magazine, simple hydraulic height adjustment and powered magazine with controlled back pressure, servo carton flap closing, bucket conveyor/barrel loader, bucket carton transport delivers all the precision performance customers require and expect in its class.

The L200 also comes standard with the following features :

Tool-less transport lug replacement, Color 15" touch screen operator interface, Machine mounted electrical enclosure, Step-in guard door design with all necessary interlocks.

The L200 also offers a variety of options and pre-engineered system package enhancements like:

Overhead tamp system, 4 gun gluing system, cycle stop flap closing system open flap detect / reject system.

Further, a complete cartoner system package with a totally integrated **standard, pre-engineered** infeed and transfer system package can be supplied in the following options:

Rotary vane with incline bag infeed or with smart belt infeed or as an overhead sweep (in-line or right angle) with smart belt infeed.

The Legend® Series L200 Cartoner offers pre-engineered configurations both as a single cartoner or system package with product handling infeed transfers that requires minimal customization which result in shorter lead times (8 weeks) and lower cost to customers.

Kraken Automation Inc. has provided since 1988, innovative, quality automation equipment and integration services to increase packaging and processing line performance and efficiency. The company designs, engineers, manufactures markets and sells packaging/process machinery and fully automated systems for domestic and international industries. Kraken has extensive experience in food, beverage, chemical and pharmaceutical industries.
