

Efficiency, Efficiency, Efficiency “The number one issue facing plant operations today is improving production efficiency”

Comprehensive Line of Case Packing, Case Erectors & Sealers

Kraken Automation recently added to its family of packaging automation solutions arsenal a comprehensive line of Case Packers, Erectors & Sealers. Kraken has also gone further to develop a versatile delivery infeed system for its Case Packing line which optimizes the entire pick and place case packing operation. You therefore not only get a case packing machine but a totally integrated functioning system.

Increased Productivity, Flexibility, Reliability, Lowest Cost per Case, Higher Throughput, Maximum Uptime, Innovative Solutions, Repeatability, Quantifiable ROI

Our packaging line of Case Packers, Erectors and Sealers represent the most rugged, economical value solutions available on the market. Offering a marriage of both simple technology, to more complex servo type performances, all based on customer end-use requirements. With Kraken Automation's advancements and success with Transfer and Infeed technology systems, we have been able to optimize the throughput efficiency of Case Packing operations. By applying smart delivery and product gapping systems we are able to work in sync with multi-merge conveying and accumulation applications to precision place products exactly on time with case packers.

Together with our Case Erectors and Sealers solutions Kraken Automation is now able to deliver a formidable total solutions package for all case handling/management applications. For a complete understanding of the many innovative solutions and efficiencies available, contact Kraken Automation today. *(For more model information and performances contact Kraken Automation)*

Solutions at a Glance:

Case Packers

- KCP350 Case Loading System- High Speed Top Load 35 cases per minute. Up to 4 cases loaded simultaneously. Precision product placement.
- KCP700 Small Footprint High Speed Servo Style performance
14 cpm on a single position, 68"X60" machine footprint. Low ownership cost – conventional components.
- KFP500 Low Cost Flexible Pouch Packing System 30-90 bags per minute (pillow & sup). 68"X60" small footprint. Low ownership cost – conventional non-servo components

Case Erectors

- KCE720 Small Footprint Case Erector- 12 Cases Per Minute
42"X70" machine footprint (XL).
- KCE300 2-Side Positive Opening Case Erector- 20 Cases Per Minute.
2 side positive. Hot melt applicator available.
- KCE350 High Speed Case Erector- Rugged and Dependable 35 cases per minute. Dependable mechanical erection. Magazine capacity +300 cases
- KTF300 Mechanical Tray Former- Glued Corner Trays 35 trays per minute. 36"X72" machine footprint

Case Sealers

- KCS400TT Case Sealer/Closer- Rugged and Fully automatic Top case Closer
Full interlock guard. 30 cases per minute. 40"X50" small footprint. Hot melt applicator option (72" frame)
